SIX WEEKS SUMMER TRAINING

REPORT

on

Android App Development/Cake Online Shopping App

Submitted by

Vipin Goriparthi

Registration No:11914513

Program Name:B.tech(Information Technology)

Under the Guidance of

Sudipta Paitandi

School of Computer Science & Engineering

Lovely Professional University, Phagwara

(June-July, 2021)

DECLARATION

I hereby declare that I have completed my six weeks summer training at “Fifthforce”, Kolkata from 05-06-2021 to 13-07-2021 under the guidance of Sudipta Paitandi. I declare that I have worked with full dedication during these six weeks of training and my learning outcomes full fill the requirements of training for the award of degree of android app development, Lovely Professional University, Phagwara.

Name of Student: Vipin Goriparthi

Registration no:11914513

ACKNOWLEDGEMENT

I would like to thank my teacher Anindya Banerjee for helping me with this project. He allowed me to work on this project.

I would also want to thank my group members who helped me in finalizing this project within a limited time frame.

Summer training Certificate

ABSTRACT

Modern hands held devices such as smart phones and PDAs have been increasingly powerful in recent years. Dramatic break throughs in processing power along with the number of extra features included in these devices have opened the doors to a wide range of commercial possibilities. In particular, most cell phones regularly include almost all feature that a PC provides.

As mobile devices have over-came the PC in terms hand on uses. Most of the works can be done through it such as payment, shopping, food ordering etc. We introduce the Online Cake Ordering App (Cherry Cakes) developed for the Android Users.

The prime objective of “Cherry Cakes” is to provide a platform for the cakes shops to increase their sales and improve reputation in the market. The user can find his/her liking shop to order the cake, they can also see the menu of that shop to order. User have to pay online through safe portals and cake will be delivered.

The project is developed in Java Programming Language. We use Android Software Development Kit (SDK) which includes a variety of custom tools that helps us develop mobile applications on Android Platform. We used Git Hub to share the code and development of the project among the Group Members.

TOOLS AND TECHNOLOGY

- Android Studio
- Git Hub
- Also.in

Reason: Code changes can be witnessed in the emulator or physical device on real-time without restarting the app or building a new APK (Android Application Package file) every time. Featuring an intelligent Code Editor equipped with IntelliJ IDEA interface, Android Studio makes code writing and analysis faster, easier and more accurate.

PROFILE OF PROBLEM

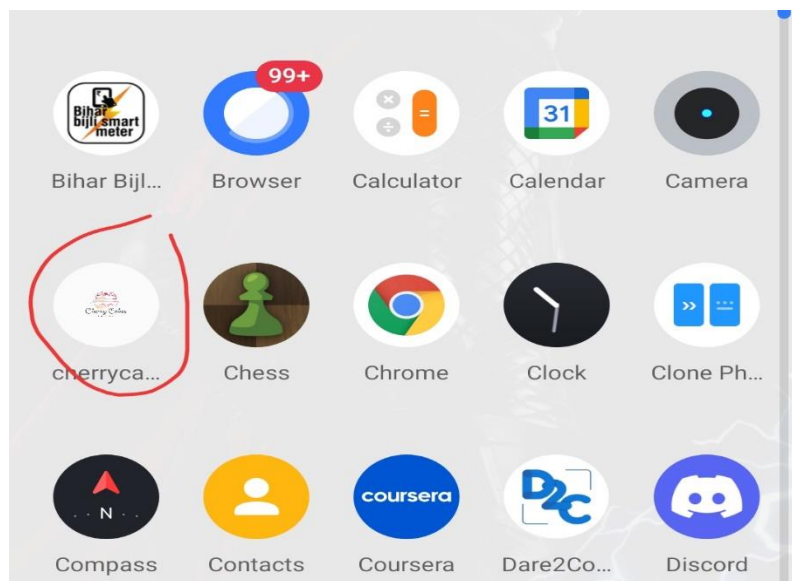

1. Help Cake business to go online
2. Increase sales and reputation
3. Help entrepreneurs to grow their business in digital world.
4. Online payment
5. Option to choose your liking shop
6. Attractive user interface

RESULTS AND DISCUSSIONS

Introduction

This chapter highlights the results of the project, code and snapshots for each of the activities are shown along with the discussion of each activity describing it's working. Each snapshot describes every single step of the Cherry Cake App. All main activities as well as options provided to the users in each activities.

Snapshots of outputs

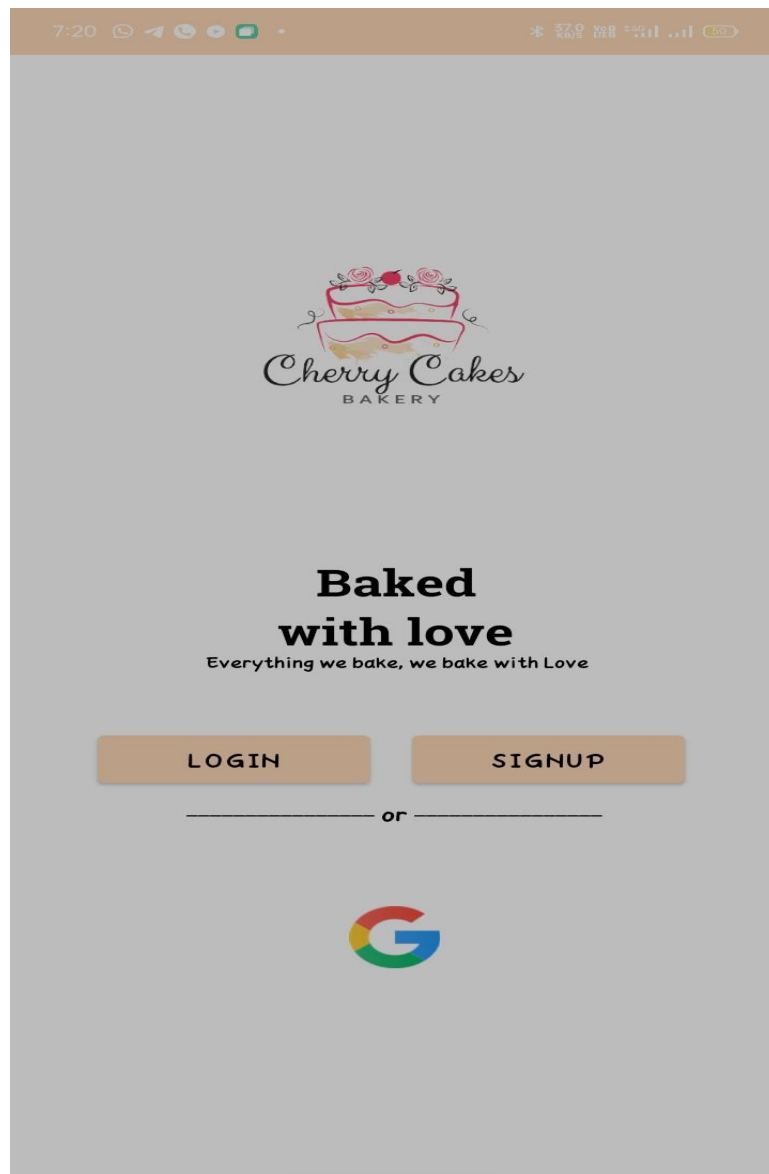

The circled icon is the image icon representation of the Cherry Cakes (online cake ordering app) on clicking it will open the application which results in the creation of the first activity.

This is the first screen or activity of the project output, which will open the app with a little bit of animation which will lead to the user interface.

5.

After the app starts the users will see this screen where they have to sign up for the new users or login who have already registered.

6.

Become a Member

Email-Address

Password

Confirm Password

REGISTER

Existing User? Login Now.

If the user taps on the signup option user will be directed to this page where he/she has to provide a valid email and a strong password to register.

7.

7:22 14.0 50%

Verify Phone Number

Please enter your Country Code and phone Number for Verification

+91

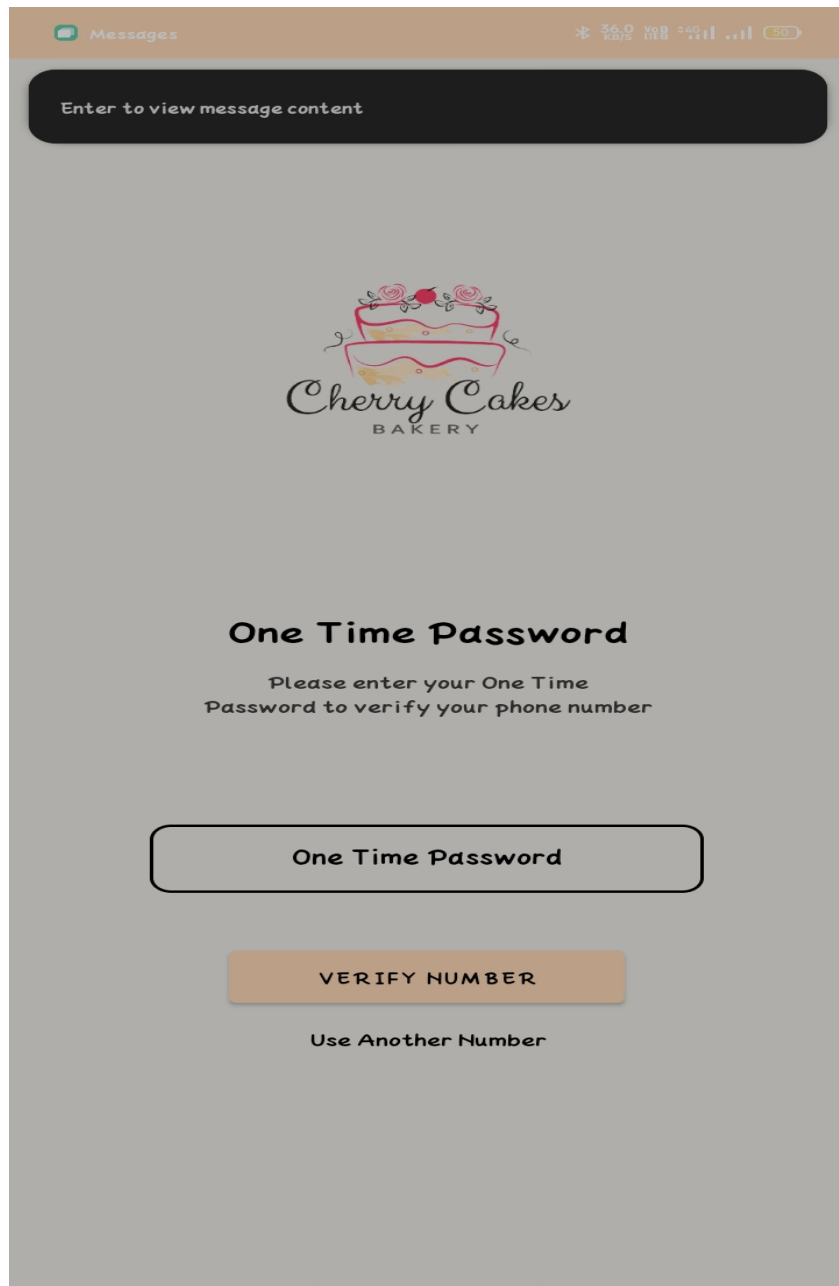

Enter Phone Number

GENERATE OTP

Successfully Registered

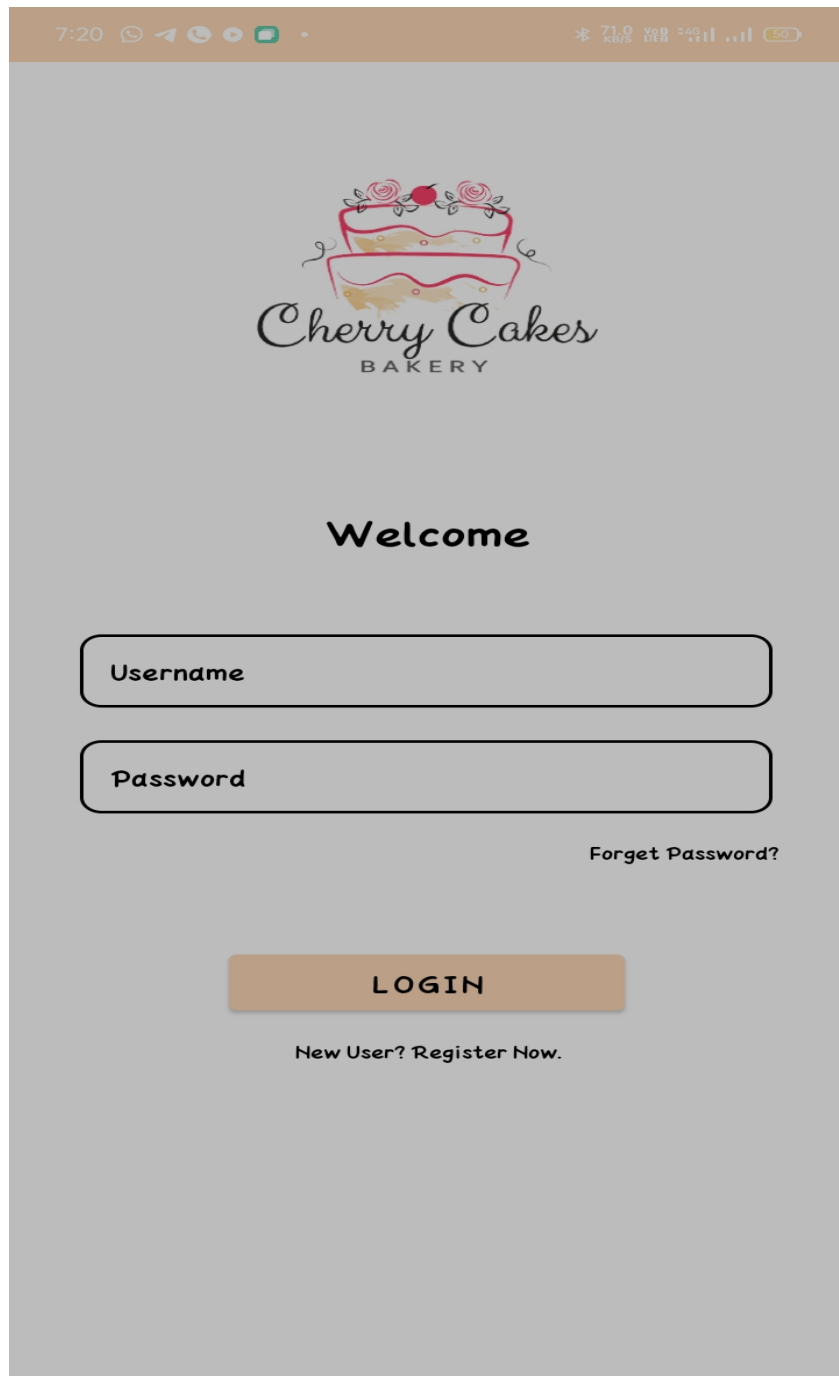

After clicking on the register option user have to provide a valid phone number for more security reasons and generate OTP.

9.

Now user have to type the OTP that has sent on the number provided during registration to verify the number. In case number does not matches, user have to try again.

10.

The image shows a mobile application login screen for 'Cherry Cakes BAKERY'. At the top, there is a status bar with the time 7:20, various notification icons, and network/battery indicators. The app's logo, featuring a pink cake with cherries and the text 'Cherry Cakes BAKERY', is centered. Below the logo, the word 'Welcome' is displayed. There are two input fields: 'Username' and 'Password'. To the right of the password field is a link that says 'Forget Password?'. A large orange 'LOGIN' button is centered below the input fields. At the bottom, there is a link that says 'New User? Register Now.'.

Cherry Cakes
BAKERY

Welcome

Username

Password

Forget Password?

LOGIN

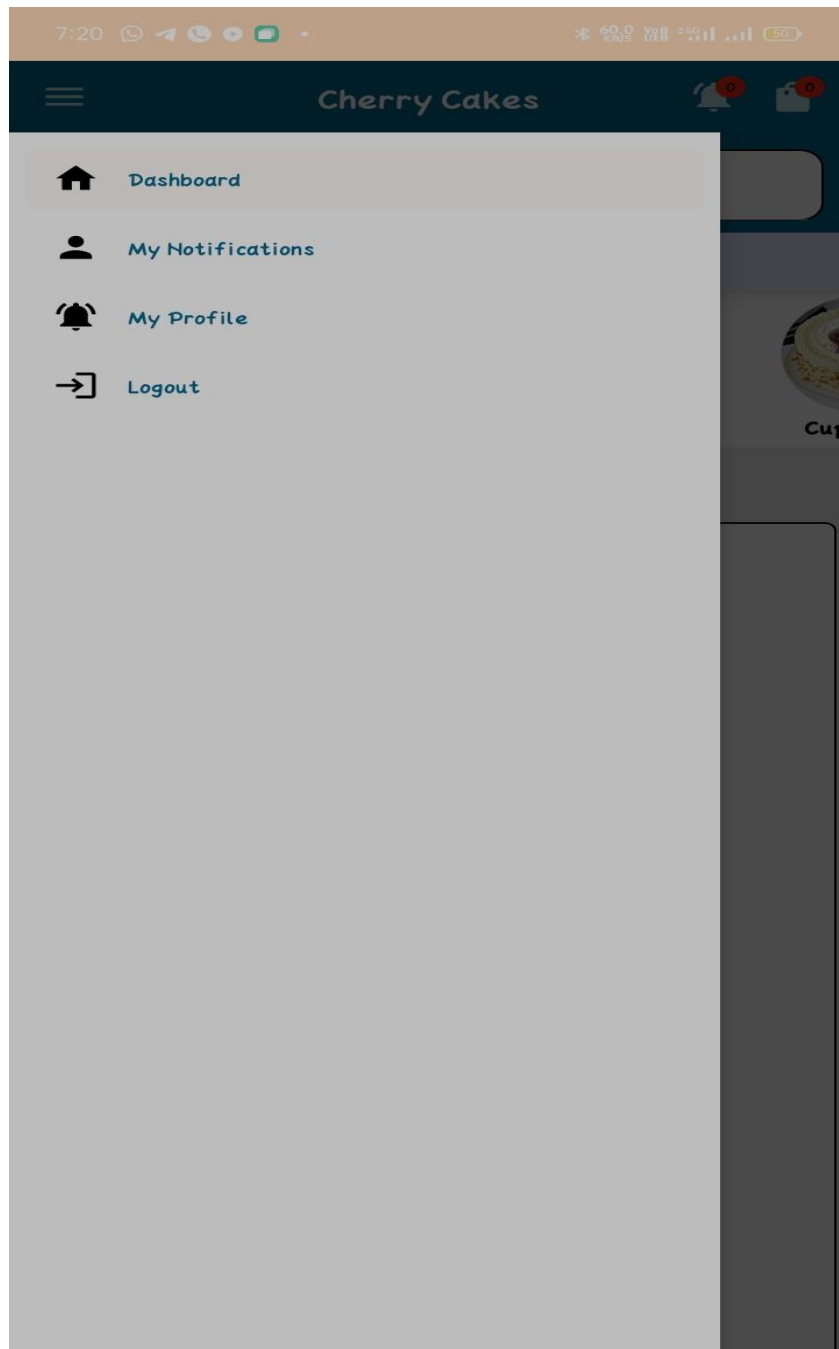

New User? Register Now.

In case user have already registered, user have to provide login credentials to login. In user does not remember the password, there is option of “Forgot Password?” to help login with registered number.

11.

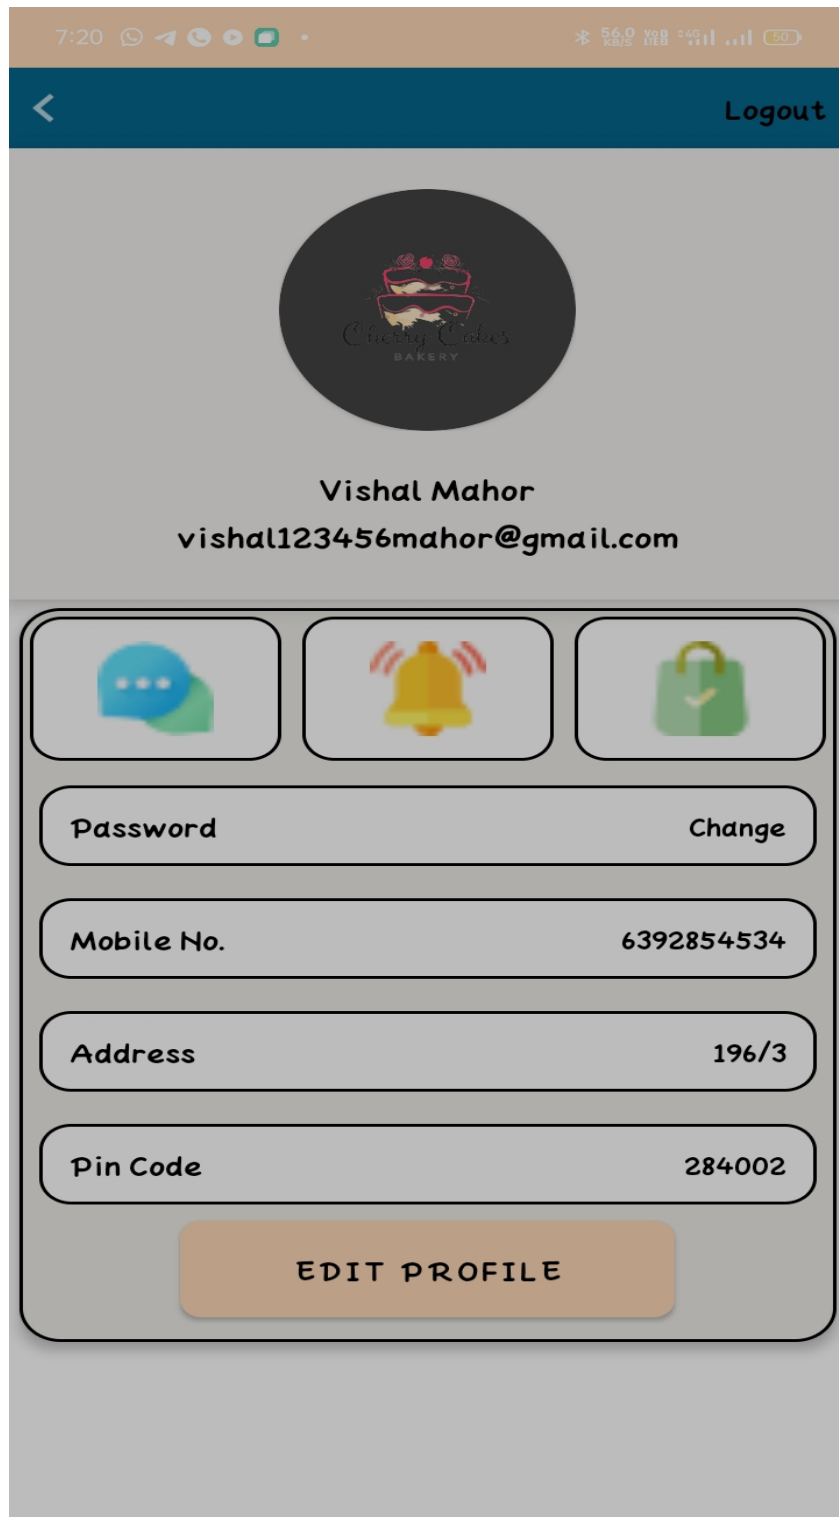

After successful login user will land on this page where he/she will see various kind of cakes and options to choose from them to order or explore.

These are the options that are available for the user to help them to better their experience with the app. Here we have provided some of the basic options like notification, profile, logout etc.

13.

Here users can update their profile easily and update their address, password or mobile number for better choice.

```

SYSTEM REQUIREMENTS

On Client Side

1. Must be an Android User
2. Android Jelly Bean 4.2 or upper
3. Fast internet connection
4. Minimum RAM 512 mb

On Server Side

1. Dual-Core 1.6 Ghz or higher.
2. 2 GB RAM.
3. 500 MB free disk space.
4. Android studio
5. Secure server
6. Fast internet connection

Features

1. Secure Login-Logout (password encrypted)
2. User Friendly
3. Free for Use
4. Open Source
5. Fast Delivery

Development Tools

1. Android Studio
2. Java Programming Language
3. Git Hub
4. Also.in

Future Scope

1. Live Chat
2. Comments
3. Like Dislike
4. User validation using mail and password recovery
5. Improve Security
6. Cross Platform App

Daywise Topics

Day	Topic
Day-1	Your first Android App & button clicks
Day-2	Using Intents Returning Data from Intents, Using Action
Day-3	Buttons
Day-4	Using List View
Day-5	Using Alert Dialog
Day-6	Using Notifications, Splash Screens
Day-7	Using Multithreading, Async Task
Day-8	Using Services
Day-9	Using the Adapter class
Day-10	Using Broadcast Receivers, Data Storage
Day-11	Data Storage
Day-12	Introducing SQLite
Day-13	Introducing SQLite Continued
Day-14	Using Maps, WebView
Day-15	Webservice Intro, Resources & Assets
Day-16	Using Camera, creating Charts, Fragments
Day-17	Project Guidance
Day-18	Project Guidance
Day-19	Project Guidance
Day-20	Project Guidance
Day-21	Project Presentation & Viva

SUMMARY

In this chapter we saw all the snapshots of all the activities, along with the features provided to the user. The image icon is the representation of the Cherry Cake App. The first activity has a user login/sign in interface for the user. After validating the sign in through OTP, user see the dashboard of the app where he/she can search for the shops, see their menu and order the cake. On the left side there is a slide of various option for the user to choose such as my profile, favourite items, log out options etc. User can even search by the shapes of the cake. All members of the group have tested this app and its features. And we are happy to say it's a very attractive and responsive app to order cake online.
